

PROGRAMMABLE LOGIC CONTROLLERS

Potentia with over 25 years of rich experience in process industries provide you with reliable, & high performance PLC systems that connect to industrial internet to drive smarter and more efficient outcomes

OUR OFFERINGS

Potentia’s programmable Logic Control systems offer a single, scalable solution to deliver safe, secure communication between real-time deterministic controls and non-deterministic applications to analyze and optimize your operations, maximizing productivity and minimizing downtime. Our PLC systems includes:

- Programmable Automation Controllers
- Industrial I/O
- Control Drives
- Software Solutions
- Industrial Ethernet Switches
- Safety Control

Potentia’s Programmable Automation Controllers feature an extensive range to support scalable automation and minimize downtime. Redundant by design, these compact controllers use PROFINET for better performance and productivity. Rugged, finless design means more durability and better performance in any environment.

Our Control Drive solutions are as durable as they are versatile and scalable, improving application performance and boosting productivity. Full integration with our PLC System controllers creates a simplified startup and programming process. Just turn the key and get more reliability and consistent performance in the toughest of environments.

Our industrial ethernet switches are the complete package: rugged and compact, with reliable redundant power inputs for higher availability, and fully integrated into our PLC Machine Edition development environment. you peace of mind. Ensuring safety and compatibility to international standards.
